

# To our brothers and sisters at ILWU

---

The Dockers in Denmark want to give you all our support in the struggle against the greedy companies trying to avoid Dockers and Unions to sign cba's and keeping OUR jobs.

It is disgraceful to see these companies getting help from the police, trying to criminalize and destroy the right to what for many years has been our work.

We find their methods to get higher profits disgraceful. This is not about creating jobs, but only higher profits, we are proud to support your fight against this and we all need to participate in this 'war' to keep our jobs.

All over the world these greedy companies are buying land and throwing good organized workers out.

This we can't allow, we all have to work very intensively on our international community's solidarity.

Just to mention a few, Philadelphia and Del Monte, Cosco in Piraeus Greece, Deepwater Container Terminal Gdansk, DCT Gdansk in Poland.

The European Port Packets did, after great protests from Dockers all over the world, fall. But now these companies are slowly winning port by port, country by country.

We need to fight this issue, and have daily contact with unions in between.

It is with the greatest possible support that we the Dockers in all of Denmark send our support to you our brothers and sisters in ILWU Port of Longview.

On behalf of all the Dockers in Denmark

President of Danish national Dockers branch

Per Andersen
